

21.5" SLIM MEDICAL GRADE DISPLAY MEDDP 722

HIGH PRECISION DISPLAY WITH COMPACT AND SLIM DESIGN

Customers are really going to like our latest MEDDP-722 21.5" medical grade display. The 1920 x 1080 Full HD projected capacitive multi-touch screen offers a wide viewing angle and high contrast ratio to produce high quality images even in dark areas of the picture. With its compact, slim profile and fanless and ventless design the MEDDP-722 is both easy to install and clean, making it suitable for just about any healthcare environment. You'll be impressed with this feature-rich display's multiple I/O ports, convenient cable management, and capacitive touch function keys that make it a pleasure to use. Naturally, the MEDDP-722 includes all the latest medical certifications, making it your best choice for a medical grade display, and one that I can confidently recommend.
