

75mm Hex AnkaScrew Screw-In Anchor

The **AnkaScrew Screw-In Anchor** is a removable, medium-duty, thread-forming fixing designed for secure anchoring into bitumen, concrete, brick, hollow brick and block. Its non-expansion design allows installation close to edges or other fixings without cracking or damaging the substrate, making it suitable for both temporary and permanent installations. Ideal for securing your roadside units.

Manufactured from **hardened, ductile carbon steel**, AnkaScrew provides dependable performance and strong holding capability in construction environments.

Features

- Hardened carbon steel for strength and durability
- Zinc plated for corrosion resistance
- Flanged hex head design for high pull-out strength
- Serrated washer face helps clamp fixtures securely and resists loosening
- Fully removable anchor suitable for permanent or temporary applications
- Does not expand—ideal for close-to-edge installation

Technical Specifications

Parameter	Value
Anchor Size	10 mm
Anchor Length	75 mm
Maximum Fixture Thickness	25 mm
Drill Hole Diameter	10 mm
Fixture Hole Diameter	13 mm
Minimum Hole Depth	95 mm
Socket Size	15 mm
Material	Hardened Carbon Steel
