

## 6 mm Regular Link Chain – Hot Dipped Galvanised

The **6 mm Regular Link Galvanised Chain** is designed for general-purpose use across agricultural, industrial, security, and barrier applications but also a must for securing roadside units. The **hot-dip galvanised finish** provides high corrosion resistance and protection against outdoor exposure, making it suitable for long-term use in harsh environments.

This chain is supplied **by the metre** for flexible length requirements.

### Features

- 6 mm diameter for an ideal balance of flexibility and strength
- Hot-dipped galvanised finish for enhanced corrosion resistance
- Suitable for a wide variety of outdoor and industrial applications
- Available **per metre**
- Durable construction for extended service life

### Specifications

Parameter	Value
Diameter	6 mm
Construction	Regular Link
Finish	Hot Dipped Galvanised
Sold By	Per metre or
Usage	General purpose

### Typical Applications

- Securing Roadside counters such as Metrocounts or Diamond Traffic counters
