

Shoulder Nails Flat Head Galvanised 150mm x 5.6mm

Product Overview

The **Flat Head Galvanised Shoulder Nail** is designed for secure anchoring in road, construction, and outdoor applications. Manufactured from high-strength steel and coated with a galvanised finish for corrosion resistance, it provides reliable performance in harsh environments.

Technical Specifications

Parameter Value

Product Type Shoulder Nail

Head Type Flat Head

Finish Galvanised

Length 150 mm

Diameter 5.6 mm

Material Steel

Application Ground anchoring, road tube installation, construction fastening

Features

- Heavy-duty design suitable for outdoor deployment
- **Galvanised coating** for rust and corrosion protection
- Flat head for improved fastening stability
- Suitable for soil, compacted surface, and roadside environments

Typical Applications

- Road tube installation and traffic counting systems
- Construction and general fastening
- Ground anchoring for equipment and fixtures
- Signage and temporary roadside equipment
