

## Single Road Tube Installation Kit – Preassembled for Convenience

The **Single Road Tube Installation Kit** is supplied fully preassembled and ready for immediate deployment.

Each kit includes all components required to complete a standard single-tube installation for vehicle counting and traffic study applications.

Ideal for first-time users and experienced field operators alike, this kit provides all the essential accessories and hardware needed to get started—without additional preparation or sourcing of individual parts.

---

### Kit Includes

- 1 × 15 m road tube
- 5 × 70 mm road nails
- 8 × 150 mm shoulder nails
- 3 × road flaps
- 1 × road tube clamp (with nut/bolt)
- 1 × road tube anchor (Chinese finger)
- 5 × washers
- 1 × vent plug

---

Designed for **fast, practical setup in the field**, this kit ensures secure placement and reliable performance on site.

Suitable for a wide range of traffic monitoring applications and compatible with **all vehicle counters, road-tube counters, and road-tube based classifiers.**
