

TECHNICAL DATA SHEET

Lock to Suit Traffic Tally 2 (TT-2) Counter

Protective Locking System

Product Description

This lock is specifically designed to secure the **Traffic Tally 2 (TT-2)** vehicle counter. Built for durability and reliable field use, it prevents unauthorised access to the counter's front cover and internal components during roadside traffic studies.

Compact, weather-resistant, and easy to operate, this lock provides essential protection for TT-2 units deployed in public or remote environments.

Key Features

- **Direct fit** for the Traffic Tally 2 (TT-2) counter
 - **Heavy-duty construction** for long-term outdoor use
 - **Corrosion-resistant materials**
 - **Smooth key operation** for quick access
 - **Compact and lightweight**
 - Secures the TT-2 **faceplate** and internal settings
 - **Affordable replacement or backup lock**
-

Technical Specifications

Parameter	Specification
Product Type	Security Lock for TT-2 Counter
Material	Zinc alloy or hardened steel body (depending on batch)
Finish	Corrosion-resistant plated finish
Lock Type	Keyed cam-style lock
Keying	Standard keyed
Compatibility	Traffic Tally 2 (TT-2) IP67 aluminium counter

Parameter	Specification
Operating Use	Secures plastic molded cover
Weather Resistance	Suited for roadside outdoor environments
Weight	Approx. 35–50 g (typical)

Applications

- Protecting **Traffic Tally 2 (TT-2)** counters in roadside deployments
 - Preventing tampering, unauthorised reset, or access
 - Ideal for councils, contractors, and traffic surveyors using TT-2 units
-

Installation

1. Insert lock into the TT-2 molded plastic cover.
 2. Secure using the integrated locking cam.
 3. Test key rotation to confirm full engagement.
 4. Keep spare keys in a secure location.
