

Application Note

Hex Ball Driver – 4mm (Bondhus)

VDE/1000V Rated | Ball End Hex Design

The **Bondhus Hex Ball Driver** is an essential tool for tightening or loosening screws with a hexagonal socket — especially in tight or awkward spaces. A must-have tool for servicing **MetroCount counters** and other precision equipment.

Key Features

- Brand: **Bondhus**
- Ball End Hex Driver
- Tip Size: **4 mm**
- Standard Screwdriver Handle
- **VDE / 1000V Approved** for electrical safety

Why You'll Need It

The **ball end** design allows the driver to engage the screw from an angle — perfect when screws are recessed, obstructed or there isn't enough room to position the tool straight on.

This makes it ideal for:

- MetroCount traffic counter units
- Fine mechanical work
