Application note

Stainless Steel Security Strap – Built for Strength & Reliability

Engineered from rugged stainless-steel wires tightly woven together, this **high-strength wire rope strap** is designed for tough environments. It's the ideal solution for securing equipment, counters or assets installed in remote locations for extended periods of time.

This **SS Security Strap** is built to perform — offering exceptional abrasion and fatigue resistance, high tensile strength, and long-lasting structural stability. The rust-proof stainless steel core is **encased in durable plastic** for ease of handling, with reinforced eyelets compatible with heavy-duty padlocks. It's made to look great and to **stand the test of time**.

✅ **Features & Specifications**

- Material: Stainless steel
- Colour: Silver
- Individual wire diameter: 4 mm
- Length: 1.8 metres
- Tough, durable, and flexible
- Rust and corrosion resistant
- Compatible with heavy-duty locks
